Camino Real Regional Mobility Authority

Regional Mobility Authorities, In General

- A regional mobility authority (RMA) is a political subdivision of the State of Texas. RMAs are intended to develop, operate and maintain *transportation projects* that assist in the improvement of the regional and statewide transportation systems.
- A *transportation project* is broadly defined and includes: highways/roadways (toll and non-toll), rail facilities, ferries and airports, pedestrian and bicycle paths, parking facilities/meters, intermodal hubs, international crossings and mass transit systems.

Camino Real Regional Mobility Authority

CRRMA – Brief History

- Created by the City of El Paso in 2007
- Authority to operate within the City of El Paso, County of El Paso and across jurisdictional lines into the State of New Mexico and the Country of Mexico (e.g. international bridges)
- Involved in the expenditure of almost \$600,000,000 in major El Paso transportation projects since the CRRMA's creation in 2007
- Provided different roles in the various transportation projects pursued to date, including planning, financing, design, construction as well as maintenance & operation
