

# PERCEPTICS

## We Read You Loud and Clear.

### Who We Are

Founded in 1979, Perceptics has been providing advanced imaging technology designed, engineered and assembled in the USA for over 40 years. We pride ourselves on delivering highly accurate technology and excellent customer service to our customers.

### What We Do

We provide advanced vehicle identification and operations hardware and software backed by decades of experience. From real-time license plate reading to vehicle occupant detection, our imaging products simplify tolling, commercial vehicle operations, border security and more.

#### IDENTIFICATION AND OPERATIONS SOFTWARE

Accurate artificial intelligence (AI) software is at the core of what we do. Our Summitt software line includes software solutions for license plate reading (LPR), DOT, hazmat, invoicing & more.

#### VEHICLE IDENTIFICATION HARDWARE

Perceptics engineers high-quality, thoughtfully designed intelligent camera systems for license plate, DOT and hazmat identification.

#### VEHICLE OCCUPANT IMAGING

Hardware and software solutions that capture images inside the vehicle and use face capture technology to identify occupant counts, biometrics & distracted drivers.
